## VIEWING STOCK LEVELS IN CRM

Stock levels of products can be viewed quickly and easily within CRM. The instructions below highlight how this can be done:

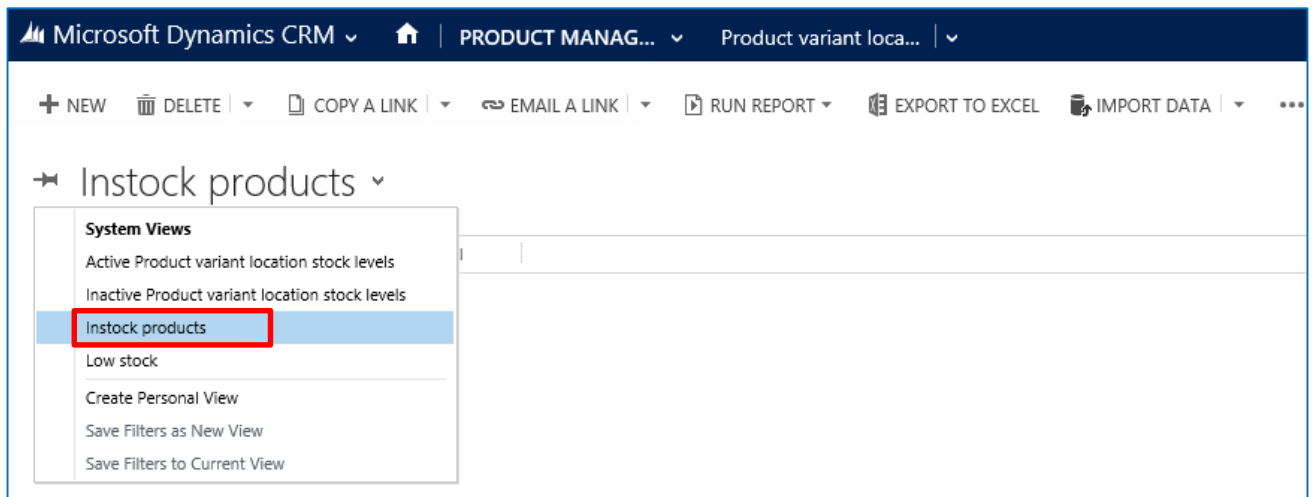

- a) Select the **Microsoft Dynamics CRM** tab in the navigation bar and from the drop select **Product Management**.

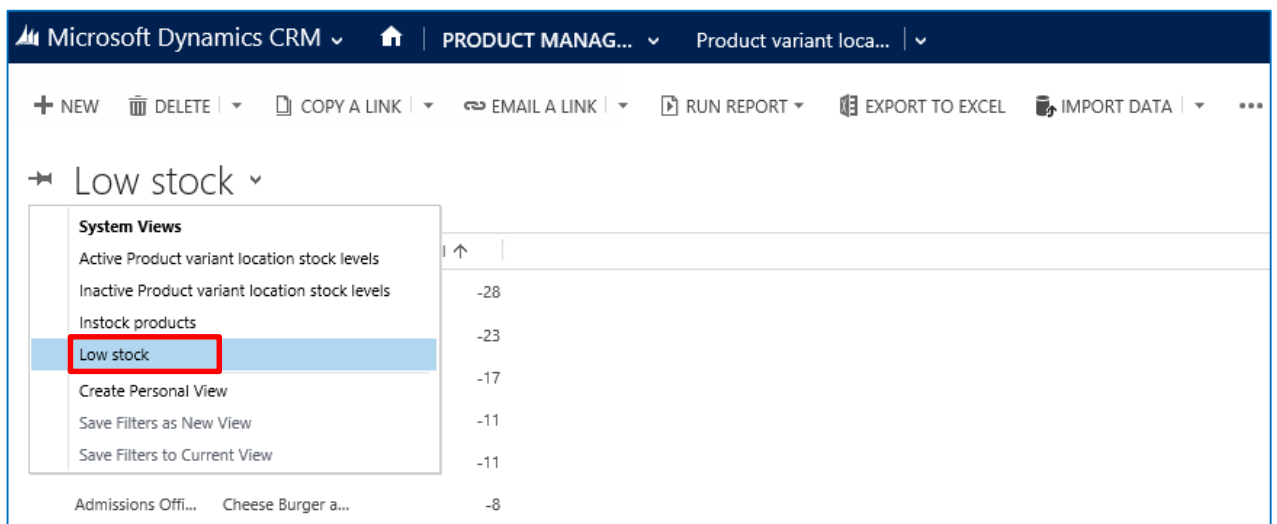

- b) Select **Product Management** in the navigation bar and from the drop down select **Product variant location stock levels**

- c) The **Active Product variant location stock levels** view will be displayed. The view can be changed by selecting **Instock Products** from the drop down to show all products that are currently in stock.

- d) Alternatively the view **Low Stock** can be selected to show products that are low on stock.
